DIED.

WILLIAMS—At Grants Pass, Oregon, Friday, May 31, 1907, Claude E. Williams, aged 33 years.

The funeral services will be held at Pleasant Valley school house at 2 p. m., with interment in Pleasant Valley cemetery. The deceased had lived in Grants Pass the greater part of his life, having grown to young manhood here. For about five years he occupied the position of salesman at the E. C. Dixon store until a year ago, when he was forced to resign his position on account of ill health. He was a young man of exceptionally fine character, intellectual, and a favorite with all who knew him. He leaves a father and mother, four brothers and a large circle of friends to mourn his untimely death.

The S. P. train schedule was again demoralized this week. No. 16, north, due Wednesday night, did not arrive until Friday morning, 30 hours late. The delay was caused by fire on the big trestle between Siskiyou and Colesett.

On Tuesday afternoon the Ladies Aid Society of Newman M. E. church held their regular monthly social meeting in the parlors. A large number of members and friends were present and the time passed swiftly in pleasant social intercourse. A short program was carried out. Then Mr. Beckman was called to take the floor and Mrs. T. B. Cornell in behalf of the Home Missionary Society, presented him with a handsome sofa pillow containing the names of many members of the church and other friends. Her address was very interesting and suitable to the occasion telling of the high esteem in which he and his family are held by the people here. Mr. Beckman's response was greatly enjoyed. He referred to the Martha who served long ago and to the alabaster box of ointment, very precious, broken on the pastor's feet. His address was not long but full of kindness and best wishes for us all. After this refreshments of ice cream and cake were served.

Fifty-two of the prune growers of Marion county have organized a co-operative insurance company to carry the risks on their prune dryers and other farm buildings. The high rate charged by the old line insurance companies on prune dryers is given as the cause for the farmers embarking in the venture to carry their own insurance.

Grants Pass 14, Jacksonville 3—is the result of the ball game of last Sunday which was played on the A. C. grounds in this city. It was very evident from the start that the game was going to be a one-sided affair as the Grants Pass boys found very little trouble in hitting Wilcox, the Jacksonville pitcher, from the start and kept it up throughout the game, getting in all 14 safe hits, while Pernoll, the Grants Pass pitcher kept up his old style of "putting 'em over" and allowing only three safe hits. The Grants Pass boys go to Jacksonville Sunday for a return game which they are confident of winning, while Jacksonville is in just as confident of beating them.

The A. A. C.'s new suits have arrived and the boys will make their first appearance in them at Jacksonville this next Sunday.

The Medford and Ashland teams crossed bats on the Ashland diamond last Sunday, Medford winning by a score of 5 to 3. The same teams play again this Sunday at Medford.

A Valuable Copper Property.

Ellis Imber was in Grants Pass Wednesday on his way from his home at Williams to the mines of the Chetco Copper Company, of which he is superintendent. These mines are situated on the head of Chetco river 15 miles west of Kerby. Mr. Imber has been there since early in the Spring with a small crew doing development work and he came out last week to get his family and for supplies. Mrs. Imber accompanied him to the mine and will have charge of the boarding house for this Summer. Grant Patton, of Placer, and H. E. Imbler, of Ashland, both of the Company, who have been to their homes for the past week will return to the mine next week.

Supt. Imbler stated that his Company now had 25 claims located and that each had a most encouraging outlook for becoming a good producer of copper. Assays of the ore show 2 to 24 per cent copper with the greater part of the ore running above 10 per cent and also carrying considerable gold. They have found eight distinct veins on their property that are from 150 to 400 feet apart and which have been traced for a mile and a half on the surface. The plan of the Company is to fully develop these claims so that the value of the property may be known and then it will be placed on the market.
